

Artist introduction

Csaba Gulyas is a musician and composer, and Earthspaces is his artistic name. He was born in 1966 in Hungary in Europe. He lived in Germany for years, but at the moment he lives in Hungary's capital, Budapest. Former cameraman, and 3D graphician. He has made music for many years but until now just for himself and for fun. After he lost his parents over the same weekend, as a kind of reflection he developed his own music style. This is hard to describe because he uses very different instruments from many musical styles in a harmonic way.

For him the point of making music is the music itself, and through it to pass on positive feelings to other people. He is moving absolutely crossover with his music there are tracks from many directions, a bit (any kind of) Electronic-Dance, a bit Chillout and Downtempo, and Ambient, a bit World Music, and Alternative, and even nearly Meditation music too. He calls it simply Earthspaces. He made and released 2 albums since 2011.
